Exhibit 99.2

FINANCIAL SUPPLEMENT FOURTH QUARTER AND FULL YEAR 2021

Forward-Looking Statements

Certain statements in this report, including information incorporated by reference, are "forward-looking statements" as defined by the Private Securities Litigation Reform Act of 1995 ("PSLRA"). The PSLRA provides a safe harbor under the Securities Act of 1933 and the Securities Exchange Act of 1934 for forward-looking statements. These statements relate to our intentions, beliefs, projections, estimations, or forecasts of future events and financial performance. They involve known and unknown risks, uncertainties, and other factors that may cause our or industry actual results, activity levels, or performance to materially differ from those expressed or implied by the forward-looking statements. In some cases, you can identify forward-looking statements by words such as "may," "will," "could," "should," "should," "expect," "plan," "anticipate," "target," "project," "intend," "believe," "estimate," "predict," "potential," "pro forma," "seek," "likely," "continue," or comparable terms. Our forward-looking statements are only predictions, and we can give no assurance that such expectations will prove correct. We undertake no obligation, other than as federal securities laws may require, to publicly update or revise any forward-looking statements for any reason.

Factors that could cause our actual results to differ materially from what we project, forecast, or estimate in forward-looking statements, include without limitation:

- Related to COVID-19:
 - Governmental directives to contain or delay the spread of the COVID-19 pandemic have disrupted ordinary business commerce and impacted financial markets. These governmental actions, the
 extent, duration, and possible alteration based on future COVID-19-related developments that we cannot predict, could materially and adversely affect our results of operations, net investment
 income, financial position, and liquidity.
 - The amount of premium we record may be reduced and our underwriting results may be adversely impacted by (i) voluntary premium credits on in-force commercial and personal automobile policies, (ii) state insurance commissioner or other regulatory directives to implement premium-based credit in lines other than commercial and personal automobile, and we may be required to return more premium than warranted by our filed rating plans and actual loss experience, (iii) the effects of our voluntary efforts or the directives from various state insurance regulators to extend individualized payment flexibility and suspend policy cancellations, late payment notices, and late or reinstatement fees, (iv) return premiums that could be significant because our general liability and workers compensation policies provide for premium audit of revenues and payrolls, and (v) collectability of premiums, which may be impacted by policyholder financial distress and insolvency.
 - Our loss and loss expenses may increase, our related reserves may not be adequate, and our financial condition and liquidity may be materially impacted if litigation or changes in statutory or common law (i) require payment of COVID-19-related business interruption losses despite contrary terms, conditions, and exclusions in our policies or (ii) presume that COVID-19 is a work-related illness compensable under workers compensation policies for employees who contract the virus, regardless of whether they worked in industries defined as essential in various COVID-19-related governmental directives or interacted with the public as part of their job duties.
 - Our net investment income may be impacted by the significant equity and debt financial market volatility resulting from the COVID-19 pandemic and the related governmental orders because (i) financial market volatility is reflected in our alternative investments' performance, (ii) increased spreads on fixed income securities may create mark-to-market investment valuation losses that reduce unrealized capital gains and impact GAAP equity, and (iii) net realized losses may increase if we intend to sell more securities, particularly in asset classes that are more significantly impacted by COVID-19-related governmental directives and to which the Federal Reserve Board is providing liquidity and structural support.
 - To varying degrees, the effect, lifting, or lapsing of COVID-19-related governmental directives in 2021 have disrupted supply chains and caused shortages of products, services, and labor. These shortages may impact our ability to attract and retain labor, including increasing attrition rates, wages, and the cost and difficulty of obtaining third-party non-U.S.-based resources.
- Difficult conditions in global capital markets and the economy, including the risk of prolonged higher inflation, could increase loss costs and negatively impact investment portfolios;
- Deterioration in the public debt and equity markets and private investment marketplace that could lead to investment losses and interest rate fluctuations;
- Ratings downgrades on individual securities we own could affect investment values and, therefore, statutory surplus;
- The adequacy of our loss reserves and loss expense reserves;
- Frequency and severity of catastrophic events, including natural events such as hurricanes, tornadoes, windstorms, earthquakes, hail, severe winter weather, floods, and fires and man-made events such as criminal and terrorist acts, including cyber-attacks, explosions, and civil unrest;
- Adverse market, governmental, regulatory, legal, or judicial conditions or actions;
- The geographic concentration of our business in the eastern portion of the United States;
- The cost, terms and conditions, and availability of reinsurance;
- Our ability to collect on reinsurance and the solvency of our reinsurers;
- The impact of changes in U.S. trade policies and imposition of tariffs on imports that may lead to higher than anticipated inflationary trends for our loss and loss expenses;
- Uncertainties related to insurance premium rate increases and business retention;
- Changes in insurance regulations that impact our ability to write and/or cease writing insurance policies in one or more states;
- The effects of data privacy or cyber security laws and regulations on our operations;
- Major defect or failure in our internal controls or information technology and application systems that result in harm to our brand in the marketplace, increased senior executive focus on crisis and reputational management issues and/or increased expenses, particularly if we experience a significant privacy breach;
- Potential tax or federal financial regulatory reform provisions that could pose certain risks to our operations;
- Our ability to maintain favorable ratings from rating agencies, including AM Best, Standard & Poor's, Moody's, and Fitch;
- Our entry into new markets and businesses; and
- Other risks and uncertainties we identify in filings with the United States Securities and Exchange Commission, including, but not limited to, our Annual Report on Form 10-K and other periodic reports.

These risk factors may not be exhaustive. We operate in a continually changing business environment, and new risk factors that we cannot predict or assess may emerge from time-to-time.

Non-GAAP operating income, non-GAAP operating income per diluted common share, and non-GAAP operating return on common equity are measures comparable to net income available to common stockholders, net income available to common stockholders per diluted common share, and return on common equity, respectively, but excludes after-tax net realized and unrealized gains and losses on investments. They are used as important financial measures by management, analysts, and investors, because the timing of realized investment gains and losses on sales of securities in any given period is largely discretionary. In addition, net realized and unrealized gains and losses on investments that are charged to earnings could distort the analysis of trends. These operating measurements are not intended as a substitute of rnet income available to common stockholders, net income avail
